

Infrastructure upkeep and Compliance maintenance burdens your team and inhibits business innovation.

Ensure ongoing Reliability, Scalability, Security & Compliance without unpredictable costs, repetitive manual effort, and tech-debt.

Focus on delivering company-defining innovation quickly and within budget by automating Infrastructure upkeep, Compliance, Maintenance, and DevOps.

## BEFORE BOS

- DevOps & CloudOps is a black-box with high costs and turnover
- Many dev-cycles lost on compliance maintenance & reporting headaches
- Wasted Cloud and tool license spend with over-provisioning or unused assets
- Challenges & anxiety around data storage and conformance with regulation
- Downtime risk associated with security maintenance and incident response

## WITH BOS

- Cloud & DevOps work is automated at less than the cost of one developer
- Hundreds of hours saved from automated provisioning & reporting per ISO/SOC2/HIPAA requirements
- Optimal Cloud setup and tool consolidation saves ongoing costs like Kubernetes, Cloud Formation, Kibana, Prometheus, etc...
- Data storage provisioning handled by experts
- 99.99% uptime with automated end-to-end DevOps, real-time incident response, and observability

Click below to hear customers share how BOS helps them

Corey Whiting  
CTO, RoyFi

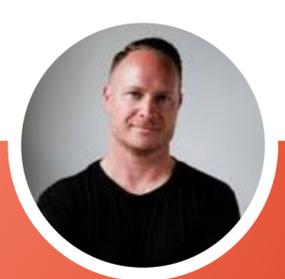

I can be more forward facing because I know that things are handled in the background.

Marterrious (Mars) McClain  
CTO, SecondKeys

BOS allowed us to do that in a matter of months.

Chris Miller  
CEO, Juniper

So I was able to have solid infra with built-in DevOps at a much lower cost.
